

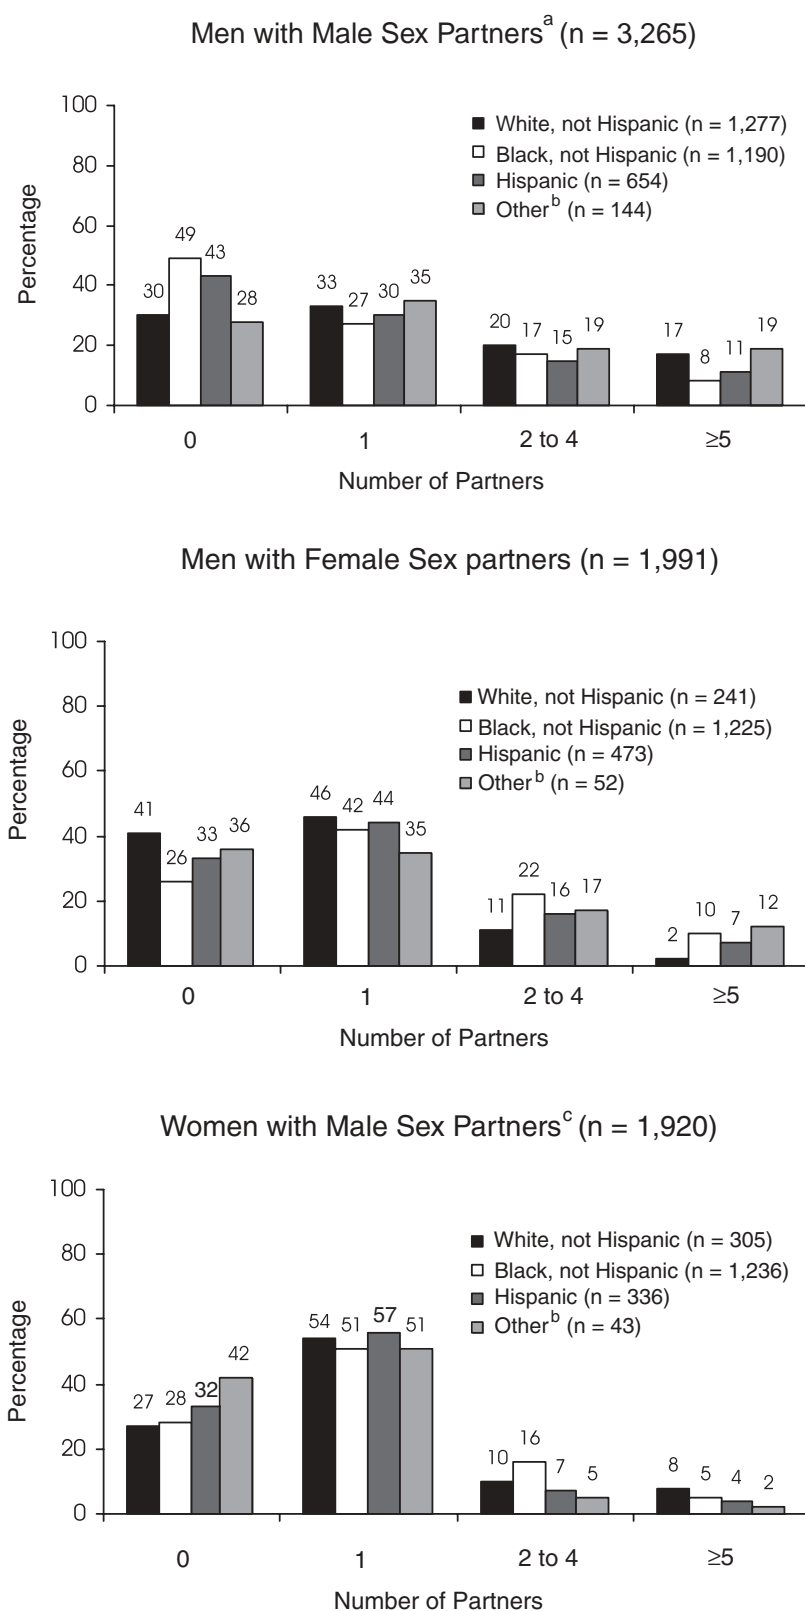

Figure 2. Proportion of respondents with 0, 1, 2 to 4, or ≥ 5 sex partners in the past 12 months, by race/ethnicity, Supplement to HIV/AIDS Surveillance, June 1997– December 2000

^aIncludes 569 men who reported sexual contact with both males and females.

^bIncludes Asian/Pacific Islanders, American Indian/Alaska Natives, and persons who reported two or more races.

^cIncludes 63 women who reported sexual contact with both men and women. Data on women who reported only female sex partners during the past 12 months not displayed due to small numbers: $n = 29$.
